

T Series motor protector & safety cut-out

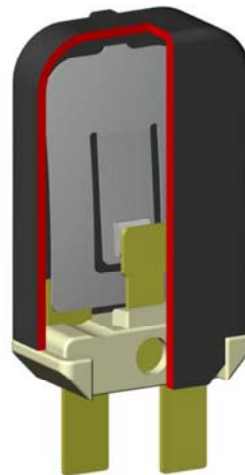

Designed for 12 and 24 Volt high current switching in automotive DC applications, utilising the well proven 'snap-action' principle.

The T Series offers a full range of current and temperature sensitive combinations to give optimum protection for and given situation.

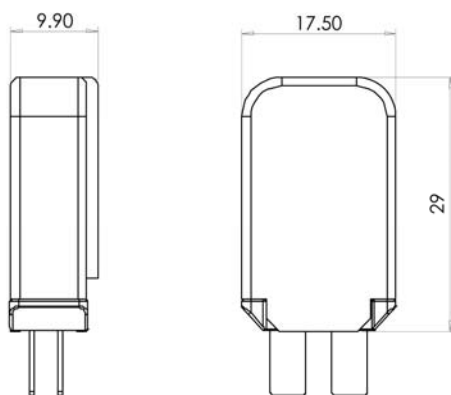

Extending the Otter range to protect higher power motors the T Series is capable of switching currents in excess of 100A at 12V DC.

TECHNICAL DATA

DC Rating	Up to 25A continuous at 20°C
DC Endurance	33A at 24V 35,000 cycles
Temperature Range	Min 50°C to max 170°C
Ambient Temperature	50°C above set temperature or 200°C max
Terminal Material	Brass or Nickel Silver

STANDARD CONFIGURATION

FEATURES

- High current switching
- Insulated cover optional
- Robust construction
- Positive 'Snap Action'
- Suitable for automotive environments
- Weld or solder terminals
- Wide performance range

APPLICATIONS

- Wound components
- Printed circuit boards
- Automotive electric motors
- Wiring harnesses
